

Liquid Roofing Products

Acrylabs *Liquid Applied Roof Membrane* Systems

Acrylabs is the leading manufacturer of premium acrylic liquid applied roofing systems, serving the residential, commercial, and industrial markets. Our A.L.A.R.M. - Systems are engineered to deliver long-term performance, durability, and sustainability across a wide range of applications. Acrylabs formulations are designed for maximum adhesion to both new and existing substrates.

When combined with Acrylabs high strength Fabric Reinforcement, these products create an unmatched liquid applied roof membrane system that is fully adhered, seamless, and highly durable. Applying the Acrylabs system directly over existing roofs eliminates costly tear-offs, reduces waste, and keeps materials out of landfills. The finished membrane is UV resistant, flexible, and long lasting, and after years of service, the system can be renewed with a single maintenance coat—extending the roof life and renewing the warranty.

- Easy to Install & User Friendly
- Water-Based
- No Expensive Equipment Required

The A.L.A.R.M. - System can be applied to concrete, plywood, OSB, EPS, fiberglass, cement board, asphalt, BUR, modified bitumen, EPDM, single-ply membrane systems, and metal.

- Restores aging metal roofs
- Eliminates the need for tear-offs
- Versatile Application

- Renewable
- Sustainable
- Reflective
- Waterborne
- Seamless
