

Project Profile

# Island Style Roof

## Project Specifications:

- ◆ Florida
- ◆ 4500 S.F.
- ◆ Existing Home

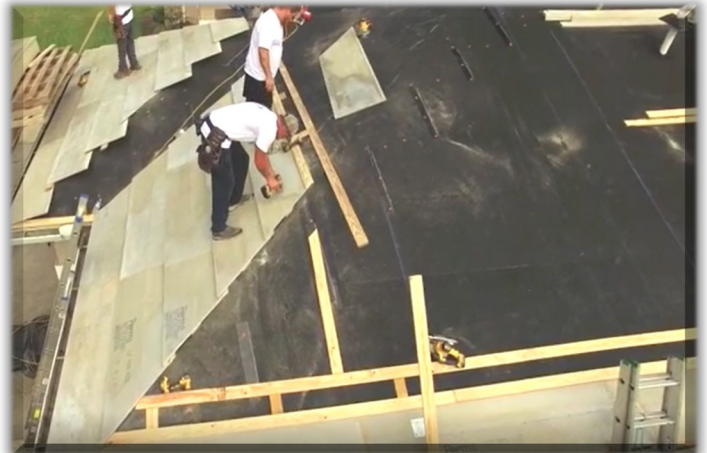

Completed look of an Island Style Roof

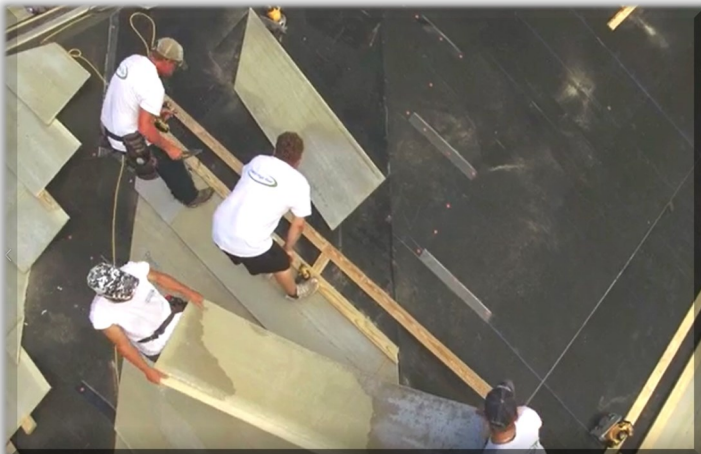

## About the project:

The homeowner needed a new roof and wanted a new look. The Island Style Roof (ISR), offers a tropical feel that shingles and metal cannot. The ISR can be installed with basic roofing and carpentry skills. This installation took a total of 2-3 weeks to complete, at less cost than a traditional tile roof. ISR is offered in many colors. In this case, the homeowner chose a white finish and lowered the heat gain in the attic by 30 to 40 degrees.

Aligning the hips and valleys for a good look

Applying Finish Coat on top of Acrylabs Base System

Contractors laying out the lath strips and cement boards
