

## Approved Applicator Program

The program to become an **Acrylabs Approved Applicator** requires three full roof projects using the **Acrylabs Liquid Applied Roof Membrane-Systems** on three different substrates (EPDM, modified, BUR, metal, Dens Deck, etc.) With Acrylabs' assistance, this gives the contractor a chance to go through the following steps:

- Identifying a project as suitable for the application of the Acrylabs Systems
- Determining the appropriate Acrylabs specification
- Evaluating the conditions for repairs and corrections to ponding areas
- Estimating quantities of materials including appropriate products of the required system
- Preparing the surface in accordance with substrate and conditions
- Applying the system correctly
- Satisfying any punch list items and closing the project

Based on successful completion of the above items, approved applicators are eligible for system warranties. Additional items required in order to maintain good standing include:

- Evidence of maintaining appropriate insurance
- Timely payment of invoices with our distributor partners
- Positive relations with customers
- Exercising safe working habits and site conditions
- Good jobsite housekeeping

Approved applicators that demonstrate quality performance on a variety of roof types and maintain good relations with Acrylabs for a period of five years, will be considered for Pinnacle status. Pinnacle applicators are eligible for Acrylabs extended warranties beyond the ten-year standard, as well as qualify for 20 & 25 year warranties.

Acrylabs C.S.S. team will provide on-site training and technical support for initial projects and subsequent projects as needed.
